Experience

Full-Stack Developer - Archbee • Dec 2024 - Present

- Owned the end-to-end development of core product features for a collaborative knowledge base platform, leading a complete web app UI redesign while managing the public [@archbee/app-widget](#) package and refactoring its bulk PDF export workflows, file manager, and auto-publish pipelines.
- Developed and published the public Archbee CLI ([@archbee/cli](#)) npm package, enabling local workspace previews and full CRUD documentation workflows via public APIs.
- Built custom rich-text editor blocks and plugins using Plate.js / Slate, integrating real-time collaborative synchronization, autocomplete systems, and interactive content widgets.

Full-Stack Developer - WebitFactory • Aug 2024 - Dec 2024

- Engineered full-stack features for an online gaming platform using Next.js and NestJS, integrating third-party providers, raffles, promo codes, and Web3 functionalities.
- Optimized application performance, resolving critical bugs to ensure continuous platform stability.

Full-Stack Developer - Sessions • Jan 2021 - Aug 2024

- Implemented core video conferencing features, including user onboarding, authentication flows, and interactive widgets (audio player, polls, chat, Q&A).
- Developed core integration modules to seamlessly connect platform services with third-party platforms like Notion and Evernote.

Project / Product Manager - Premium IT Technologies • Apr 2018 - Jan 2021

- Managed and coordinated the department's core integration projects and new payment method deployments.
- Created, optimized, and maintained the platform's cashier routing logic and fraud prevention rules.

Game Developer & QA Tester - Freelance • Jul 2015 - Apr 2018

- Developed client and server-side features for Unity-based multiplayer games while managing full-cycle QA testing and debugging.

Education

Economic Informatics • Jul 2013 - Jul 2016

Faculty of Cybernetics, Statistics and Economic Informatics

- Relevant courses: Web Programming, Database Systems, Data Structures and Algorithms, Object-Oriented Programming (C++)
